Cautions during Use

- Follow instructions in 'Cautions during Use'.
Otherwise, it may cause unexpected accidents.
- Power supply should be insulated and limited voltage/current or Class 2, SELV power supply device.
- When installing the unit on pipe line, use the hexagon part of connections not to turn the unit with a pipe wrench. Do not use the unit with strong vibrations.
- Store the unit at the place without moisture, dust, and vibration.
- This product is not needed to take maintenance because there is no moving part. But it needs to take maintenance once a year as below instructions even though inside of pressure pipe is normally clean.
 1. Check the broken status of outside.
 2. Check the pressure slot, cleanliness inside, and corrosion state.
 3. Short each terminal and check the insulation resistance between the case and power.

- When removing a sensor for maintenance, follow the below instructions.
 1. Replace an O-ring which is used once.
 2. Be sure that diaphragm part is not damaged.
- Switch or circuit breaker should be installed nearby users for convenient control.
- The unit cannot be repaired due to disassembled structure.
- The unit is fixed with bolt and nut at the both sides of case. Do not press excessive load ($\approx 300 \text{ kg/cm}^2$), or it may cause damage to the unit.
- This unit may be used in the following environments.
 - Indoor / Outdoor (in the environment condition rated in 'Specifications')
 - Altitude max. 2,000 m
 - Pollution degree 2
 - Installation category II
